

SwapToken-NFT: ()

10 Slides | Russian & English | Google Slides Format

Whitepaper + DoraHacks BUIDL #13438 + Live Product Data

SLIDE 1 — Title /

RU: SwapToken-NFT Web3: 2013 -

- SwapToken (2013) → Immutable trust-layer NFT • Telegram- + TON + -
- API -

EN: SwapToken-NFT Web3 Trust Infrastructure: From a 2013 Blockchain to AI Verification

- Historic SwapToken blockchain (2013) → Immutable trust-layer for NFTs • Telegram bot + TON + Cross-chain bridges • Monetization via API for AI services and marketplaces

Visual:

- Background: Cosmic gradient (#0A1628 → #1E3A5F) with subtle blockchain mesh
- Center: Evolution timeline 2013 → 2026 → Future
- Large “13 Years” badge (SwapToken blockchain age)
- Bottom logos: TON, Ethereum, SwapToken PoS
- Accent: Electric blue (#00D4FF) + Gold (#FFD700) for heritage

Speaker Notes: RU: “13 . SwapToken — 2013 , Dogecoin Novacoin. legacy- immutable NFT- — API - .”

EN: “13 years of history. SwapToken is one of the first altcoins from 2013, alongside Dogecoin and Novacoin. Today we use this legacy blockchain as an immutable log for NFT metadata verification — and monetize it via API for AI services.”

SLIDE 2 — Problem /

RU: NFT-

- 90% NFT — • : immutable
- : (, ,) • DeFi NFT : LP- “ ”,
- RWA- : “ ” • -

EN: The NFT Market Suffers from a Trust Crisis

- 90% of NFTs are just images with no real utility or verifiable history • Fake links and altered metadata: no immutable version log • Tokens are static: no conditional ownership (freeze, limits, oracles) • DeFi and NFT are isolated: LP positions are “diluted”, no specific asset • RWA tokenization is stalled: no standard for “wrapping” real assets • AI services are ready to pay for reliable data — but have nowhere to buy it

Visual:

- Left: 6 pain-point icons (broken image, fake link, static lock, broken bridge, stalled RWA, AI with question mark)
- Right: Stat card “\$2.8B lost to NFT scams in 2024” (source: Chainalysis)
- Color: Red gradient accents for pain points

Speaker Notes: RU: “ , . NFT- — , NFT .” EN: “The trust crisis costs the industry billions. We’re not building another NFT marketplace — we’re building infrastructure that makes NFTs verifiable and monetizes that verifiability.”

SLIDE 3 — Solution /

RU: SwapToken-NFT:

1. (Smart Wrappers) • (Jetton, ERC-20, SwapToken) “ ” NFT • : , , , • DeFi- : LP-NFT, ,
2. TRUST-LAYER (Immutable Log) • NFT- SwapToken-PoS (2013 .) • IPFS-CID, URL, — • :
3. - (AI API) • - • + = recurring revenue

EN: SwapToken-NFT: Three Pillars of Trust Infrastructure

1. SMART WRAPPERS • Any token (Jetton, ERC-20, SwapToken) is “wrapped” into an NFT • Dynamic conditions: freeze, limits, oracles, balance updates • DeFi integration: LP-NFT, collateral, yield farming
2. TRUST-LAYER (Immutable Log) • Hashes of all NFT links are recorded in SwapToken-PoS (blockchain since 2013) • IPFS-CID, URL, oracles — all fixed in an immutable log • Authenticity verification: compare current link with history
3. AI MONETIZATION (AI API) • AI services and marketplaces pay for access to historical data • Micro-fees + subscriptions = recurring revenue with high margins

Visual:

- Central triangle diagram: Smart Wrappers (top) → Trust-Layer (left) → AI API (right)
- Each pillar with icon and color coding
- Bottom: “13 Years of Immutable History” badge

Speaker Notes: RU: “ , . NFT, 13- - .” EN: “Three pillars that no one else combines. We wrap tokens into manageable NFTs, record every change in a 13-year-old blockchain, and sell access to this history to AI services.”

SLIDE 4 — Market Opportunity /

RU: : \$67B 2028

- TAM: \$280B — RWA, NFT - (2028) • SAM: \$67B — TON- , - NFT- , DeFi- , - • SOM: \$2.1B — 3 : TON DeFi- , RWA- , NFT- , -
- : • RWA- : +340% 2024 (: RWA.xyz) • TON- : 50M+ , 800M+ MAU Telegram • - : \$12B 2027 • DeFi TVL TON: \$300M \$2B 2024

EN: Market: \$67B by 2028

- TAM: \$280B — global RWA tokenization, dynamic NFT & AI data infrastructure market (2028) • SAM: \$67B — TON ecosystem, cross-chain NFT wrappers, DeFi integration, AI data verification • SOM: \$2.1B — first 3 years: TON DeFi users, RWA platforms, NFT marketplaces, AI aggregators

Key Trends: • RWA tokenization: +340% in 2024 (source: RWA.xyz) • TON ecosystem: 50M+ users, 800M+ MAU Telegram • AI demand for reliable data: \$12B market by 2027 • DeFi TVL on TON: growth from \$300M to \$2B in 2024

Visual:

- TAM/SAM/SOM nested circles (left 55%)
- Right side: 4 trend cards with growth arrows
- Bottom: “340% RWA Growth” + “50M TON Users” badges

Speaker Notes: RU: “TON — 2024-2025. 50 Telegram. RWA — . - , .” EN: “TON is the fastest-growing blockchain of 2024-2025. 50 million users via Telegram. RWA is the hottest trend. And AI services are ready to pay for data that we’re already collecting.”

SLIDE 5 — Product & Technology /

Visual:

- Table with live status badges (green = LIVE, yellow = TESTNET, blue = PLANNED)
- Right side: QR code to Telegram bot + screenshot preview
- Bottom: Social media icons row
- “DoraHacks #13438” badge

Speaker Notes: RU: “ whitepaper — working product. , SWNF , NFT-GetGems. DoraHacks, GitHub, Telegram Discord.” EN: “This isn’t a whitepaper — it’s a working product. The bot is running, the SWNF token is trading, the NFT collection is on GetGems. We’re on DoraHacks, we have GitHub, a community on Telegram and Discord.”

SLIDE 6 — Business Model & Monetization / -

RU: 5 + -API growth engine

1. (Redemption Fee) 0.5–1% → treasury/DAO : \$200K/
TVL \$20M
2. (Marketplace Fee) 1–2% GetGems/Fragment : \$50K/ \$5M
3. API- (AI Micro-Fees) ★ - : • NFT- •
PoS • : \$500K/ 1000
4. (Subscriptions) , NFT- , — API- / : \$300K/ MRR
5. NFT (Referral NFTs) NFT % : , CAC \$0
: \$1.2M (Y1) → \$8M (Y3) → \$35M (Y5)

EN: 5 Revenue Streams + AI API as Growth Engine

1. REDEMPTION FEE 0.5–1% of unfrozen token amount → treasury/DAO Potential: \$200K/month at \$20M TVL
2. MARKETPLACE FEE 1–2% on primary listing at GetGems/Fragment Potential: \$50K/month at \$5M volume
3. AI MICRO-FEES ★ AI services pay for: • Historical NFT link versions • Authenticity verification via PoS-chain hash • Current vs. historical link comparison Potential: \$500K/month at 1000 active clients

- 4. SUBSCRIPTIONS Marketplaces, NFT scanners, analytics — API keys Monthly / volume-based Potential: \$300K/month MRR
- 5. REFERRAL NFTs NFT permanently earns % from referral transactions Potential: viral growth, CAC \$0

Forecast: \$1.2M (Y1) → \$8M (Y3) → \$35M (Y5)

Visual:

- 5 horizontal revenue bars with \$ potential
- “AI API” highlighted with star and growth arrow
- Right side: revenue curve 2026→2030
- Bottom: “CAC \$0” badge for referral model

Speaker Notes: RU: “ — API . recurring revenue 80%+. NFT- , , . NFT CAC.” EN: “The most interesting stream is the AI API. This is recurring revenue with 80%+ margins. Every NFT scanner, aggregator, and analytics platform will pay us for reliable historical data. And referral NFTs give viral growth with zero CAC.”

SLIDE 7 — Competitive Landscape /

RU: :

Обёртка токенов	Динам. условия	Trust-layer	DeFi интерп.	ИИ-API	История блокчейна
-----------------	----------------	-------------	--------------	--------	-------------------

wETH/wBTC Ocean Protocol Centrifuge (RWA) Chainlink () NFTfi
SwapToken-NFT (2013)
: • 13- immutable (SwapToken PoS, 2013) • ,
API • TON NFT-

EN: Positioning: The Only Hybrid Stack with History

Token Wrapping	Dynamic Conditions	Trust-layer	DeFi Integr.	AI API	Blockchain History
----------------	--------------------	-------------	--------------	--------	--------------------

wETH/wBTC Ocean Protocol Centrifuge (RWA) Chainlink (oracles) NFTfi
SwapToken-NFT (2013)
Key Differentiators: • Only project with a 13-year immutable log (SwapToken PoS, 2013) • Only project monetizing historical data via API • Only project on TON with dynamic NFT wrappers

Visual:

- Matrix table with checkmarks
- “13 Years” heritage badge prominent
- Bottom: 3 unique selling propositions as cards

Speaker Notes: RU: “wETH , . Ocean , . Chainlink — , .
SwapToken-NFT : → → → — 13- .” EN:
“wETH wraps but without conditions. Ocean provides data but no wrapping. Chainlink is oracles but no history. Only SwapToken-NFT gives the full cycle: create → manage → verify → monetize — and all based on a 13-year-old blockchain.”

SLIDE 8 — Roadmap /

RU:

- Phase 1: FOUNDATION (Q2–Q3 2026)  • Telegram- MVP + FunC- TON testnet •
SWNF (Blum Memepad) • NFT- GetGems • SwapToken-PoS trust-layer (
) • DoraHacks BUIDL #13438
- Phase 2: CROSS-CHAIN & DeFi (Q4 2026) • Chainlink CCIP / LayerZero (TON Ethereum) •
RWA (,) • NFT • API-
- Phase 3: SCALE (2027) • STON.fi, DeDust (LP-NFT) •
DAO- RWA- • 50+ • TVL : \$200M+
- Phase 4: AI ECOSYSTEM (2028+) • - • standalone
• SwapToken-PoS • TVL : \$1B+

EN: Development Phases

- Phase 1: FOUNDATION (Q2–Q3 2026)  COMPLETED • Telegram bot MVP + FunC contracts on
TON testnet • SWNF token launch (Blum Memepad) • NFT collection on GetGems • SwapToken-PoS
trust-layer integration (link hashes) • DoraHacks BUIDL #13438
- Phase 2: CROSS-CHAIN & DeFi (Q4 2026) • Chainlink CCIP / LayerZero bridges (TON Ethereum)
• RWA oracles (price, status) • Referral program with NFTs • API micro-fees launch
- Phase 3: SCALE (2027) • STON.fi, DeDust integration (LP-NFT) • Subscription model for market-
places & analytics • DAO voting for new RWA objects • 50+ corporate clients • TVL target: \$200M+
- Phase 4: AI ECOSYSTEM (2028+) • AI-automated liquidity strategies • Historical data infrastructure
as standalone product • SwapToken-PoS audit & optimization • TVL target: \$1B+

Visual:

- Horizontal timeline with 4 phases
- Phase 1 marked with green check “COMPLETED”
- Milestone dots with dates
- TVL targets as badges (\$200M, \$1B)

Speaker Notes: RU: “Phase 1 : , , GetGems, trust-layer .
— .” EN: “Phase 1 is complete: the bot is running,
the token is launched, the collection is on GetGems, the trust-layer is integrated. We’re not asking for
money to develop — we’re asking for money to scale an already working product.”

SLIDE 9 — Investment Thesis & Tokenomics /

RU: SwapToken-NFT —

1. • 13- (2013) — • 2 NFT-
2. , • MVP : , , , GitHub, DoraHacks •
3. • TON: 50M+ , 2024-2025 • RWA: +340% , • - : \$12B 2027
4. • 5 , API — recurring 80%+ • NFT — , CAC \$0
SWNF: • Total Supply: 1,000,000,000 SWNF • (Seed): 12% — vesting 2 , cliff 6 • : 18% — vesting 4 • (staking, DAO, grants, API-): 45% • Treasury (,): 25%
: • Seed: \$5M • Runway: 24 Series A • Use of funds: 40% , 30% , 20% , 10%

EN: Why SwapToken-NFT is a Unique Investment Opportunity

1. IRREPRODUCIBLE ASSET • 13-year-old blockchain (2013) — no one can create such history • 2 patents on dynamic NFT wrappers and link verification
2. LIVE PRODUCT, NOT A CONCEPT • MVP is working: bot, token, collection, GitHub, DoraHacks • First users and transactions already exist
3. TRENDING MARKET • TON: 50M+ users, fastest growth 2024-2025 • RWA: +340% growth, key trend • AI data demand: \$12B market by 2027
4. SUSTAINABLE ECONOMY • 5 revenue streams, API = recurring with 80%+ margins • Referral NFTs = viral growth, CAC \$0

SWNF TOKENOMICS: • Total Supply: 1,000,000,000 SWNF • Investors (Seed): 12% — 2-year vesting, 6-month cliff • Team: 18% — 4-year vesting • Ecosystem (staking, DAO, grants, API infrastructure): 45% • Treasury (liquidity, marketing, reserve): 25%

ROUND: • Seed: \$5M • Runway: 24 months to Series A • Use of funds: 40% development, 30% marketing, 20% liquidity, 10% operations

Visual:

- 4 value proposition cards (top)
- Pie chart: token distribution (bottom left)
- Fund allocation bars (bottom right)
- “Seed \$5M” badge prominent
- “13 Years” heritage seal

Speaker Notes: RU: “ — . 2013 . 1995 — . 45% — staking API- .” EN: “The main competitive advantage is irreproducible. No one can create a 2013 blockchain. It’s like owning a

1995 domain on the internet — history has value. 45% for ecosystem = aggressive growth via staking and API infrastructure.”

SLIDE 10 — Team & Next Steps /

RU:

• CEO & Architect: 12 years in blockchain, ex-Ethereum contributor (2014), creator of SwapToken (2013), 2 patents on NFT wrappers • CTO: TON specialist (FunC, TVM), 8 years in distributed systems, ex-Tendermint, cross-chain bridge architect • Head of Product: Telegram bots, aiogram, TonConnect — 5 years in Web3 UX, launched 10+ bots with 1M+ users • Head of Data: PhD ML, ex-Google AI, 15+ publications on provenance, data verification specialist for AI • Chief Legal: Digital assets lawyer, EU AI Act advisor, RWA structuring and DAO regulation experience • Security Lead: Ex-Trail of Bits, 50+ audits (TON, Ethereum), specializing in FunC and Solidity

• DoraHacks BUIDL #13438 • SWNF token: launched, trading • NFT collection: 100+ items on GetGems • Telegram bot: 5000+ users • GitHub: 15+ repositories, open source

1. Telegram bot demo: on request (15-minute session)
2. Data room: swap-token.io/investors
3. Testnet access: API keys for pilots
4. Seed closing: September 30, 2026

CONTACTS: • Email: invest@swap-token.io • Telegram: @swaptoken_invest • X/Twitter: @SwapTokenNFTs • Discord: discord.gg/7vjkeGKkX8 • Bot: @NFTswaptoken_bot

EN: Team

• CEO & Architect: 12 years in blockchain, ex-Ethereum contributor (2014), creator of SwapToken (2013), 2 patents on NFT wrappers • CTO: TON specialist (FunC, TVM), 8 years in distributed systems, ex-Tendermint, cross-chain bridge architect • Head of Product: Telegram bots, aiogram, TonConnect — 5 years in Web3 UX, launched 10+ bots with 1M+ users • Head of Data: PhD ML, ex-Google AI, 15+ publications on provenance, data verification specialist for AI • Chief Legal: Digital assets lawyer, EU AI Act advisor, RWA structuring and DAO regulation experience • Security Lead: Ex-Trail of Bits, 50+ audits (TON, Ethereum), specializing in FunC and Solidity

TRACTION: • DoraHacks BUIDL #13438 • SWNF token: launched, trading • NFT collection: 100+ items on GetGems • Telegram bot: 5000+ users • GitHub: 15+ repositories, open source

NEXT STEPS:

1. Telegram bot demo: on request (15-minute session)
2. Data room: swap-token.io/investors
3. Testnet access: API keys for pilots
4. Seed closing: September 30, 2026

CONTACTS: • Email: invest@swap-token.io • Telegram: @swaptoken_invest • X/Twitter: @SwapTokenNFTs • Discord: discord.gg/7vjkeGKkX8 • Bot: @NFTswaptoken_bot

Visual:

- 6 team cards with role + credential
- Traction metrics row (DoraHacks, SWNF, GetGems, 5000+ users, GitHub)
- 4-step CTA with dates
- Contact block: email + Telegram + QR codes
- “Demo Available” + “Live Product” badges

Speaker Notes: RU: “ CTA. — NFT- 30 . ,
 , . — 13- .” EN:
“Closing with strong CTA. The bot is running — I can create an NFT wrapper right now in 30 seconds.
We have traction, community, open source code. We’re not asking you to believe in a concept — we’re
asking you to invest in scaling a working product with 13 years of history.”
